

ManageAssess Two-Factor Authentication

February 2026

Contents

1. Scope.....	3
2. Using Two-Factor Authentication	3

1. Scope

We're committed to keeping your information safe. As part of that commitment, we have introduced Two-Factor Authentication (2FA) for all centre staff users of ManageAssess to provide an extra layer of protection for your account. To clarify, 2FA is not being introduced for learners currently.

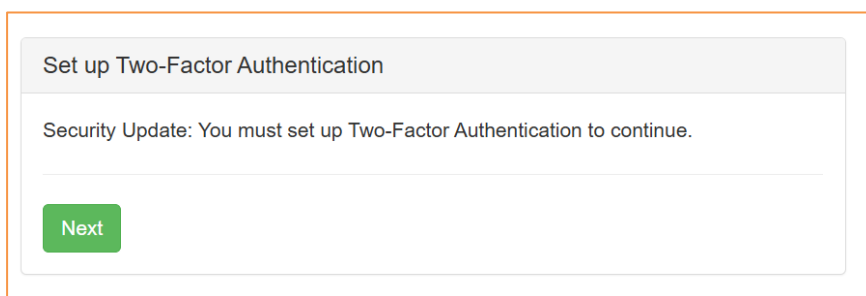

Upon logging in to ManageAssess from 16th March 2026, you will be asked to enter a short verification code, sent to your chosen device and authentication app, such as Google or Microsoft authenticator, each time you sign in. This process takes only a few seconds and significantly reduces the risk of unauthorised access.

2. Using Two-Factor Authentication

1. If you do not already have an authenticator app installed, install one on your chosen device, such as your mobile phone.

There are many mainstream authenticator apps to chose from, such as Google and Microsoft authenticator.

2. When you first log in to ManageAssess from the 16th March 2026, you will be required to enrol ManageAssess on to your chosen authenticator app.
3. Upon entering your usual username and password, you will be presented with the following message – to continue select 'Next'.

4. Using your chosen authenticator app, scan the QR code displayed on-screen.

5. ManageAssess will be added to the list of applications (auth.manageassess.com) on your chosen authenticator app, along with a 6-digit authorisation code.
6. Enter the 6-digit authorisation code into ManageAssess and select 'Next'.

7. After completing the above steps, the next time you log in to ManageAssess you will not be required to scan the QR again.
 - a. simply enter your usual username and password, and select 'Sign in'
 - b. open your authenticator app, enter the 6-digit code provided into ManageAssess and select 'Verify Code'

- c. Once a valid code is entered, select 'CONTINUE TO MANAGE ASSESS'
